Professional Summary

B.Tech AI & ML student building LLM-powered applications, agentic RAG systems and ML pipelines with Python, FastAPI, LangGraph and vector databases, shipped with Docker, CI/CD and automated testing.

Education

Galgotias College of Engineering And Technology, Noida

2024 – Present

Bachelor of Technology in Artificial Intelligence and Machine Learning

Technical Skills

Languages: Python, Java, JavaScript, SQL, HTML, CSS

Machine Learning: Supervised & Unsupervised Learning, Regression, Classification, NLP, Embeddings

Generative AI: LLMs, RAG, Agentic AI, LangGraph, Semantic Search, OpenAI API, Groq, Tavily

Libraries: Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, sentence-transformers, SQLAlchemy, pytest

Web & Backend: FastAPI, Flask, REST APIs, React, Tailwind CSS, Streamlit, OAuth 2.0, APScheduler

Databases: MySQL, MongoDB, SQLite, Pinecone (vector DB)

DevOps & Tools: Docker, GitHub Actions (CI/CD), Git & GitHub, Jupyter Notebook, Google Colab, VS Code

Experience

Program Management Intern – NeGD, Ministry of Electronics & IT (MeitY)

Jun 2026 – Jul 2026

Python, LLM, SharePoint, Web Testing, Portal Development

- Developed a dual-interface portal for **Project Manager and developer teams**, streamlining project tracking.
- Built an **LLM-powered document reader** that scores **each project's health** from SharePoint data.
- Tested **6 government websites** end to end (**DPDP, LBSNAA, MoSJE, SPORTS, MoTA, UPSC**); helped design **Suvidha** sites.

Projects

RemoteHunt: AI Job-Search Assistant

[Live Demo](#)

Python, FastAPI, SQLAlchemy, sentence-transformers, Groq LLM, React, Tailwind CSS, Docker, GitHub Actions

- Built a plugin-based ingestion system for **20+ job sources** (Greenhouse, Lever, Ashby; **~40 company boards**) with per-source API budgets, 429 back-off and health checks.
- Designed a **6-stage pipeline** (dedupe, scam detection, eligibility, match scoring) ranking jobs by **MiniLM embedding similarity**, skill overlap and seniority fit.
- Developed a resume engine with a **0–100 ATS score**, **LLM-generated suggestions**, skill-gap analysis and a **truthfulness guardrail** that blocks fabricated claims.
- Integrated the **Gmail API** (OAuth) and **APScheduler** automation; shipped **60+ pytest tests** in **GitHub Actions CI** and a public demo running in **<512 MB RAM**.

Enterprise HR Policy Copilot: Agentic RAG System

[Github](#)

LangGraph, FastAPI, Pinecone, OpenAI, Tavily, SQLite, Docker, HTML/CSS/JS

- Architected a **LangGraph agentic RAG** workflow with query routing, **LLM-based evidence grading**, query rewriting and bounded retries to prevent hallucinated answers.
- Implemented private-first retrieval on **Pinecone** with **OpenAI embeddings**, answering queries without falling back to **Tavily** web search.
- Served the agent via **FastAPI REST** endpoints with secured ingestion and a **SQLite audit trail**; containerized with **Docker** and validated on **4 end-to-end scenarios**.

Forest Fire Index (FFI) Predictor: Fire Risk Estimation Model

[Github](#)

Python, Scikit-learn, Pandas, NumPy, Matplotlib, Streamlit

- Developed a regression model to predict Forest Fire Index, achieving **$R^2 > 0.98$** and **~22% lower RMSE** across **5,000+ weather records** after benchmarking **4+ algorithms**.
- Built an interactive **Streamlit dashboard** for real-time FFI prediction with **<1 second latency**.

Extracurricular Activities

Technical Coordinator – GeeksForGeeks CB (Sep 2024 – Present): Organized 2 major hackathons, coding bootcamps and tech seminars, engaging 500+ students across campus.
